

CORPORATE ENVIRONMENTAL POLICY

Linear Technology Corporation is committed to protecting the environment, the health and safety of our employees and our surrounding communities. Linear Technology Corporation's Environmental guidelines include the following:

- **Protection of the Environment:** We conduct our operations in a manner that reduces pollution and maintains the protection of the environment.
- **Environment Regulatory Requirements and Compliance:** Linear Technology Corporation commits to comply with legal and other requirements. We strive to go beyond complying with local, state and federal compliance requirements.
- **Reduction and Disposal of Wastes:** We work towards the reduction and elimination of wastes. We strive to dispose of wastes in a method that has the least impact to the environment.
- **Audits:** We strive to conduct annual Safety and Environmental audits at each of our manufacturing facilities. We promptly implement any necessary corrective actions.
- **Continuous Improvement:** Linear Technology Corporation through its Environmental Management Systems will set environmental objectives and targets that continually improve over time. These objectives and targets will be measurable and are reviewed by management annually.

Linear Technology Corporation is proud of its environmental record and its commitment to protecting the environment. All of our manufacturing locations are ISO14001 certified and we have Green Partner agreements with several of our major customers. Our Environmental Policy is communicated to all persons working for or on behalf of our company and can be obtained from the Linear Web site or upon request.
